

Dear Partners!

From April 12, 2021, we are announcing a preferential promotion: replacing of existing old devices with new ones with an additional discount!

We actually started production of devices in 2007. The devices were named: Navigator-Timer 220V, Navigator-Timer 380V, Navigator-Skimmer, Navigator-Overflow, Navigator-Profi. Sealed conduits in these devices were located at the bottom and at the top. Since 2008, the AUTO Automatic Flushing Unit has been produced. Until now, many of them are in operation at the facilities, periodically some of them are sent for repairs.

In 2010, a production of new series of devices was launched (instead of the previous ones): TIMER, STANDARD-220, STANDARD-380, PRO, MASTER, VG (valve group), AUTO, MONO, AUTO-MINI, LEVEL with current appearance of the devices. Software and hardware have been periodically upgraded over the past ten years. During this time, we got rid of many "adverse beginnings" of the devices, so the quality has improved significantly over the past 3-4 years, although there are some work-related issues.

The essence of the promotion: if there is an old device at the facility and you (or your client) think that the time has come to replace it, then we have the following offer:

1. DARIN is ready to sell you a new device with an additional 10% discount to your existing partner discount.
2. You are obliged to send the old device to us (at your expense).

Terms of the promotion:

1. Time period from April 10, 2021 to September 01, 2021.
2. After paying for the new device, it is sent to you and you are **obliged to dismantle the old device and send it to us** at: 11 Simferopolskoe shosse, Moscow (at your expense).

Yours sincerely, DARIN
